

PRESS RELEASE

Avoiding downtime with first-class inventory management

EnviTec Biogas expands its service portfolio in Calbe/Saale, Germany

Lohne/Saerbeck, 05 September 2017 – EnviTec Service is expanding: and not just its customer base but also in terms of its square metres of warehouse space. Alongside the established warehouses in Lohne and Friedland, existing storage space has now been expanded at the Calbe/Saale site in Germany. Complementing large and small parts units of approx. 160 m² and 80 m², respectively, a further 80 m² of office space is also available.

This location will also be interesting for external customers, as a result of its extensive service parts management for series 3 and 4 CHP units manufactured by GE Jenbacher.

“By expanding our warehouse facilities at the Calbe site, we’re aiming to accelerate and improve the availability of replacement parts and consumables for plant operators in the region between Braunschweig, Berlin and Leipzig – and therefore reduce their downtime,” explains Martin Brinkmann, Managing Director at EnviTec Service GmbH & Co. KG.

The site is particularly attractive thanks to its location – only about a ten-minute drive from the Calbe exit on the A14 motorway. “Our warehouse stocks popular replacement parts for the biogas industry from a range of manufacturers, including GE Jenbacher (series 3/4), Vogelsang, Börger, Netzsch, Seepex, Niemann, Xylem, E&H and Vega, as well as a wide range of gate valves, fittings and electrical/electronic parts,” Brinkmann continues.

Apart from stockpiling important components, the service experts in Calbe also offer a workshop for the reconditioning and repair of small parts, such as pumps and agitators. “Once customers are registered in our system, order for replacement parts can simply be placed by telephone,” says Brinkmann. “And if we have the replacement part in stock, customers can simply call to pick up the part they want without even having to place an order,” he continues: “our standardised design makes it possible to keep large stocks of many popular parts.”

About EnviTec Biogas AG

EnviTec Biogas AG covers the entire value chain for the production of biogas, including the planning and turnkey construction of biogas plants and biogas upgrading plants as well as their commissioning. The company takes charge of biological and technical services on demand and also offers full plant and operational management. In addition, EnviTec also operates its own biogas plants. In 2011, EnviTec Biogas along with EnviTec Energy GmbH & Co. KG and its 100% subsidiary EnviTec Stromkontor GmbH & Co. KG expanded its business operations into the direct marketing of upgraded biomethane as well as the marketing of green electricity and balancing energy. With a presence in 14 countries worldwide, EnviTec Biogas AG is represented by its own companies, sales offices, strategic partners and joint ventures. In 2016, EnviTec generated revenues of €162.9 million and an EBIT of €4.2 million. The EnviTec Group currently has around 460 employees. EnviTec Biogas has been listed on the Frankfurt Stock Exchange since July 2007.
